

MATE WOOD STOOL

enea

BY Estudi Manel Molina

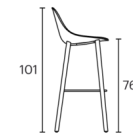

The Mate Wood stool features a 4-legged oak frame and a backrest that can be either low or high. This piece can be customised in a great number of finishes, including a polypropylene shell, with the choice of a polypropylene or upholstered seat pad, and a fully upholstered option. It is available in two different heights (medium and high), so it's equally suited to both hotel and corporate environments and private kitchens.
