## Coma - Punto / Projects

Josep Llusà

**Coma** is a functional, practical, versatile and resistant barstool program. It is a seat suitable for public and private spaces and is produced in three different heights, of which only the highest (750mm and 650mm) have footrests. The lowest version of 450mm, is the most versatile model as can be used as a seat or also as auxiliary footrest for a chair or recliner.

There is also a version with backrest, and bench, which can group up to 5 seats.

The **Punto** table is the faithful companion for the barstool Coma, although individually is equally versatile in various contract spaces.

Made of steel tube is produced in three different heights (1.100mm, 720mm y 450mm) with both bases and worktops round or square. The worktop finishes can be stratified, melamine and glass and available in 6 different colours which can be combined with each other.
