OH! is an armchair designed to meet a wide range of different spaces (waiting or meeting rooms, hotel halls, domestic spaces, kitchens or dining rooms) and stands out as a very customizable product thanks to the wide range of different variations.

Is composed of two identical pieces of plastic mounted on a painted or chromed metal frame which at the same time can be fixed (sledge foot) or swivel (three feet). The Shell is made in injected plastic and surprises by its incredible geometry which makes once assembled, the two parts of the chair look different.

It can be ordered in a very wide range of colours and combinations, upholstered or without upholstery, or leather, as the occasions demands, allowing a high flexibility of the seat/backrest finishes with optional polypropylene or upholstered finish.
