Folio / Projects

Josep Llusà

The Folio table has been specially designed to provide versatile and demanding solutions for contract spaces. Its design, detachable, foldable, stackable, can meet any need in different areas (meeting and training rooms, canteens, libraries, operational offices, conference rooms, etc.) as well as multifunctional spaces so prevalent in business, government agencies, schools or universities, allowing to create multiple compositions easily.

The table structure is composed of steel tubes painted or chromed and feet in cast aluminium, while the tops are rectangular melamine with optional customizable three-dimensional edges and made in three different widths between 1200 and 1800 mm. and depths between 600, 670 and 800mm.
