

ENECA

NOTA DE PRENSA

Legorreta, March 2012

***Enea** presents the latest novelties of the **Lottus** chair at the Salone Internazionale del Mobile of Milan 2012*

*The **Lottus chair** grows exponentially with new features making it more attractive and functional and adaptable to any home or space contract.*

Enea, a guipuzcoan company born in 1984 within the company Eredu, S.Coop., has always maintained a clear mission to provide a contemporary product design and suitable for all types of home and contract spaces. After early years devoted to designing and producing colourful and heterogeneous collections, the company decided to specialize in the manufacture and sale of the concept “seat” with an innovative design and personalized service and offer it to a national and international market.

The Enea furniture always aims to achieve the versatility, strength, ergonomics and functionality of it, without neglecting its contemporary lines, which with applications and accessories makes it ideal for domestic or public spaces use.

Enea shows at Salone Internazionale del Mobile of Milan 2012 four novelties of the **Lottus** chair, designed by Lievore Altherr Molina:

- High-back chair
- New aluminium base for office chair

- 3D wood structure on which can be mounted different frames in polypropylene, upholstered or combined and even 3D wood.
- 3D Wood frame that can be mounted on any existing structure existing in the of Eneas' catalog

The rest of the Lottus family

Lottus Barstool

A series of stools, with the seat and backrest composed of injected polypropylene frames, and the possibility of combining colours and plastic or textile finishes. These are mounted on different metallic bases: with four castor wheels, a central support and castor wheels, or on a sledge fixed support, the last two types come in two heights.

The versatility resulting from these combinations make Lottus an ideal choice for a wide range of situations, whether in the office or at home.

Lottus Chair

Lottus Chair designed following the lines and the style of the Lottus stool. This seats program is made up of injected polypropylene bench formed by a single frame combining colour and upholstery on the seat.

The design allows it to be mounted on several painted metal tube structures with a stackable 4 leg base, stackable sledge base and swivelling central leg, as well as a 4 leg chair with arms and without, with wheels, as well as 3 different types of armrests: steel, aluminium and wingshaped armrest. In the 2010 the family was extended with the new version Lottus Spin, a 4 leg base fixed or swivelling and the children's version. And since 2011 the Lottus chair is also available with integral upholstered frame and oak veneer frame.

All this combined with its contained dimensions, carefully studied ergonomics and a friendly shape makes the Lottus chair a versatile product with a wide range of applications, either in the contract at home.

Lottus Bench

The bench is also made up of injected polypropylene and on metal tube structure following the natural evolution of the chair. And by the end of 2011 is also available in two versions, with or without arms and from a minimum of 2 seats to 5 seats.

Its arms are made in aluminum, the metal structure of tubular steel, the legs in aluminum, and with different seating options in polypropylene, one-color or two-tone, with upholstered seat or integral upholstered and even wood.

Lottus Table

The Lottus table with slightly wavy shape, following the basic principles of the program, ceases to be a basic geometric shape to make an aesthetic change to the spaces.
