

COMA 4L STOOL

enea

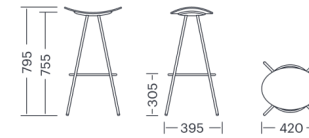

BY Lluscà Design

Structures

- Round steel tube $\varnothing 16 \times 2$ mm in cold laminate.
- Manual semi-automatic welding in arc robotics with gas-driven steel cable.
- Seats in polypropylene, plywood (beech/oak) and upholstered.

Measures

The Coma design evolution led to this version, notable for being both tough and light, and created for both public and work spaces as well as home use, thanks to its high aesthetic appeal. It also comes in three heights and a wide range of finishes makes it a functional, practical and versatile seating choice.
