Two component glider for delicate flooring

Two component linking glider for delicate flooring

Ema stool with open backrest is strong, lightweight and stackable, what makes it perfect for all kind of spaces. The sledge steel structure can be chromed or lacquered in any of our colours, and the seat and backrest are available in polypropylene or upholstered. Besides, it has an upholstered seat pad available, which is very useful for multipurpose or crowded spaces, improving stacking by causing less friction than the full upholstery version. This model comes in two heights: high and medium.
